STATE OF NEW YORK—THE CIVIL SERVICE COMMISSION

John C. Clark, President,
Willard D. McKinstry,
William Gorham Rice.

Albany, N. Y., May 24, 1917.

Chapter 574, Laws of 1917, which was signed by the Governor and became a law May 19, 1917, adds a new section to the Civil Service Laws as follows:
"30. Person employed by state or its civil divisions and cities to take

and file constitutional oath. Every person hereafter employed by the state or any of its civil divisions or cities, except as in the labor class as defined in this chapter, before he shall be entitled to enter upon the discharge of any of his duties, shall take and file an oath or affirmation in the form and language prescribed by the constitution for executive, legislative and judicial officers, which may be administered by any officer authorized to take, within the state, the acknowledgment of the execution of a deed of real property, or by an officer in whose office the oath is required to be filed. The oath of every state employee shall be filed in the office of the Secretary of the State, of every employee of a municipal corporation with the clerk thereof and of every other officer, if no place be otherwise provided by law, in the office of the Clerk of the County in which he shall reside. Every employee of the state and of each of its civil divisions and cities in such employ when this act shall take effect, except the labor class as defined in this chapter, shall take and file such oath within thirty days after this act shall take effect. The failure of such employee to take and file such oath shall terminate his employment until such oath shall be taken and filed as herein provided."

The form of the oath required is as follows:

State of New York,)
County of Wayne.) ss:

I do solemnly swear that I will support the Constitution of the United States, and the Constitution of the State of New York, and that I will faithfully discharge the duties of the office of according to the best of my ability.

.....
.....

This law applies to all public officers and employees in the civil service of the State, counties, cities, towns and villages, even though the positions held are not subject to the provisions of the Civil Service Law and rules, except persons holding positions in the labor class.

Section 8 of the Civil Service Law provides in part as follows:

"It shall be the duty of all officers of the State of New York or of any civil division or city thereof to conform to and comply with and to aid in all proper ways in carrying into effect the provisions of this chapter, and the rules and regulations prescribed thereunder and any modification thereof."

This provision of law makes it the duty of all public officers to aid in the enforcement of the statute above mentioned. It is believed the most practicable way to execute the law is to require appointing officers when submitting payrolls, estimates, accounts or vouchers for the certification of a Civil Service Commission, or for payment by a disbursing officer, to attach to the pay-rolls, estimates, accounts or vouchers, a certificate in form as follows:

I HEREBY CERTIFY that the persons named herein have taken and filed the constitutional oath in accordance with Chapter 574, Laws of 1917.

The attention of all appointing and disbursing officers in the State, county, city, village and town services is respectfully invited to the provisions of this circular.

THE STATE CIVIL SERVICE COMMISSION,

John C. Birdseye,

Secretary.

The following report of an inspection of the County Farm in the form of a letter was read and on motion of Mr. Burnett received, filed and ordered printed and the recommendations referred to committee No. 12.

State of New York.
Department of Agriculture.
Albany.

May 24, 1917.

To the Honorable Board of Supervisors of Wayne County.

Gentlemen:—

An inspection was recently made by this Department of the Wayne County Almshouse Farm. This farm contains about one hundred and fifty acres of land, of which about one hundred acres are tillable.

The crops grown for the season of 1916 were as follows:

15 acres of wheat	yielding	260 bushel
15 acres of oats	"	336 "
7 acres of barley	"	83 "
12 acres of corn	"	ensilage 80 tons
6 acres of potatoes	"	400 bushel
23 acres of hay		

The contour of this farm varied from steep hillside to fields of fairly level land, and low wet land adjoining the canal. The rainy season of 1916 is probably responsible for the rather low yields of crops. We believe that the hillsides on this farm should be seeded to alfalfa, and efforts be made to greatly enlarge the acreage of this crop.

DAIRY.—The dairy contains twelve cows, one grade Holstein bull and one heifer. No calves are raised. The cows are fed ensilage and hay and a grain ration of gluten, bran and corn meal. The practice is to separate the milk and sell the cream. The dairy stable is in the basement of the main barn and should be generally improved. For the improvement of this industry we refer to the recommendations made in a previous report as follows:

"We believe that the dairy should be made the principal industry on this farm and of such number as to consume all the roughage grown. For its management, we would advise that a pure bred bull be purchased, raising the best heifer calves to maintain the herd, using the dairy products in the home such as veal, unprofitable cows, milk and butter. In this way, the county receives all the profits. Our best dairymen today are keeping each cow's milk record and feeding well balanced grain rations. This enables them to accurately dispose of unprofitable animals. We are enclosing sample milk record blanks and feeding sheet which shows the rank of the principal cattle feeds according to the cost of digestible nutrients, with three suggested grain rations for milch cows. If it is desired, we will be glad to place you on the mailing list to receive these sheets regularly and send you a supply of the milk record blanks for use in your dairy.

It is planned to improve the dairy stable; this should be done. The present basement would not make a satisfactory stable without large expense. A better plan would be to extend the barn fifty feet to the west, locating the silos on the north inside and allowing space for lighting. This will provide room for about twenty-five cows and the present stable can be used for part of an enclosed barn yard. If desired, we will advise further regarding plans for this stable.

SWINE.—The swine consists of seven shoats and two brood sows. They have had a thorough-bred Berkshire boar heretofore and usually keep about twenty hogs. It will be necessary to buy some pigs this Spring. The hogs run in pasture during the summer and have run of yard in the winter. They are fed largely on garbage and also some grain for fattening purposes. We advise the purchase of a pure bred boar and the keeping of a sufficient number of brood sows to produce pigs for growing purposes, and to supply the pork required at the home.

POULTRY.—The poultry, consisting of about one hundred and seventy-five fowls, mostly White Leghorns, are producing nearly all the eggs and poultry products required for the institution. We are enclosing herewith grain ration for laying hens and growing chicks.

GARDEN.—The garden is well located and supplies all the vegetables used at the home.

With the present outlook and high prices for all food products, our institutions should strive in every possible way to utilize the labor of the wards of the country, and to try and increase the production of agricultural products.

Sincerely Yours,

CHARLES S. WILSON,
Commissioner."

RECESS

On motion of Mr. Brown the Board took a recess until 1:30 p. m.

REPORT OF COMMITTEE ON SITES FOR TUBERCULOSIS HOSPITAL

Your committee who were authorized to recommend a suitable site for the location of a County Tuberculosis Hospital, beg leave to submit the following report.

After inspecting at least ten different pieces of property which have been offered for sale in the towns of Galen, Lyons, Arcadia, Palmyra and Macedon, and having tried to inform ourselves as to the needs and requirements of such an institution by visiting the County Tuberculosis Hospitals in Onondaga, Montgomery, Fulton and Schenectady counties, also Sunny Crest, near the City of Auburn, advising with those in charge and getting all of the information which we considered practical as to the amount of land needed, location and construction of buildings, water supply, heating, lighting, sewerage disposal, etc. We asked the State Health Department to send some up to Wayne County to pass upon two or three of the sites which we had under consideration.

Dr. McSweeney, who is State Supervisor of County Tuberculosis Hospitals accompanied by Mr. Chase, an engineer from the Department, inspected the Downing property in the town of Macedon and the Albany Hill property in Lyons and advised that the Downing property came the nearest meet-

ing the requirements of the Department and after referring their findings to Commissioner Biggs, reported that the Department would approve the Downing property.

Your committee would therefore report that on account of the feeling in opposition to purchase of the Downing property and believing the Albany Hill property to be a suitable site and in consideration of the offer made by the Municipal Board of the Village of Lyons of a contribution of one thousand dollars, we would recommend the purchase of the Albany Hill property.

REPORT OF INSPECTION OF COUNTY JAIL

A letter from the State Commission of Prisons accompanied by the following report was presented and read and on motion of Mr. Rich received, filed and ordered printed in the proceedings.

Wayne County Jail, Lyons

Inspected September 24, 1917, Bert E. Valentine, Sheriff.

The number of inmates on the day of inspection was 4, all adult males serving sentence. The highest number since January 1, 1917, was 7. At times there were no prisoners. No females have been detained during the past year except one police prisoner held for a few hours. Since the Lyons village lockup was closed on June 8, 1916, by the State Commission of Prisons about 80 local prisoners have been temporarily committed to the County jail. The County receives one dollar for each one so detained.

Since the last inspection some commendable improvements have been made at this jail. A toilet room 12'x13', has been constructed at the end of each of the two corridors, these rooms are each equipped with shower bath, lavatory, two modern sanitary closets and stationary tubs. In addition, the interior of the stone cells have been covered with cement and painted. The old wooden stairs creaking to the second tiers of cells have been replaced with concrete stairs.

The jail is light, clean and well painted. The beds presented a tidy appearance, consisting of mattress, blankets, white sheets and pillows with cases. Three of the mattresses on each side have been encased in oil cloth. The inmates receive three meals a day and some of them work about the institution and grounds.

Respectfully submitted,

CLIFFORD M. YOUNG,

Inspector.

Mr. J. K. Gatchell,

Superintendent, Wayne County Home,
Lyons, N. Y.

Dear Sir:

Relative to the recent inspection of the water supply and sewerage conditions of the Wayne County Home made by Mrs. E. S. Chase, Assistant Engineer of this Department, I beg to point out to you the decidedly unsatisfactory and dangerous method of providing the water supply of your institution.

The use of two supplies of water from different sources, one from a relatively pure source for drinking and culinary purposes and the other from a polluted source for toilet flushing, laundry and other general uses, has been shown repeatedly by experience, to afford every opportunity for the use of the polluted supply for drinking or culinary purposes, either accidentally or willfully. In the present instances the employment of the same pump for both supplies is particularly dangerous, for the attempt to clean the pump and piping with the well water supply must not by any means be considered as an adequate safeguard against the introduction of polluted water in the well water mains. The recent outbreak of typhoid fever established this fact. Furthermore, even with the two supplies entirely separated, so long as the polluted supply is available it is subject to intermittent use for drinking or culinary purposes through carelessness of the inmates or attendants. I would therefore, strongly urge upon you the necessity of procuring at the earliest possible moment, a single supply of safe and wholesome water, adequate for the entire needs of the institution.

From the inspection there appears to be two or three possible ways whereby such a supply may be secured, namely:

(a) By sinking one or more shallow wells similar to the one already in use at such a point as it would seem probable that a water-bearing stratum might be reached. Such wells should be located remote from possible sources of contamination and should be properly curbed and covered.

(b) By sinking one or more moderately deep tubular wells and pumping therefrom with deep well pumps or if necessary raising the water therefrom by means of an air lift. As advised in the case of the shallow wells such well or wells should be located away from the sources of pollution and should be protected against the possibilities of contamination finding its way in the well along the outside of the casing.

(c) By extending a 4-inch main for a distance of about one and one-half miles from the mains of the public water supply of the Village of Lyons. This source will insure the institution an ample supply of water of a satisfactory sanitary and physical quality.

In the case of the wells, it is of course difficult to predict whether a supply either adequate or satisfactory would be obtained. On the whole therefore, it would seem that the wiser course to pursue would be to extend a 4-inch main from the distribution system of the village of Lyons. Before any course is finally adopted it would be advisable to secure the services of a competent engineer to advise as to the best and most economical means of securing a supply adequate in quantity and satisfactory in quality. The present situation is liable to result in additional outbreaks of water borne disease and no time should be lost in taking steps to remedy the situation.

Assuring you of our interest in the matter and trusting that you will inform me as to the steps you may take to carry out the above suggestions, I am,

Yours very truly,
THEODORE HORTON,
Chief Engineer.

Whereas, no benefit whatever has been received by said towns from said law, therefore be it

Resolved, that this Wayne County Board of Supervisors do declare itself opposed to the new methods of "Dog Taxation" now in effect, and hereby request our representatives at Albany to use their best efforts to have such law amended to the effect that all taxes received from dog taxation shall remain in hands of Supervisors of each town as heretofore and that all losses sustained by sheep owners from dogs shall be determined by Fence Viewers and audited by Town Board of Respective Towns.

Whereas, the Legislature at its last session in 1917 passed a law taking the control of our rural schools from her District Supervision and giving such control or management to a Town Board or Board of Trustees and with attendant, expenses and salaries attached thereto, which increased the taxes at least 25 per cent and in some districts as high as 200 per cent or more for such schools, which heretofore were managed without any expense whatever by local boards.

Whereas, this is a hardship to the town inasmuch as it takes away the Superintendent near the end of the highway season before most of them have finished their work, put up their machinery and collected all their bills for payments, placing the newly elected Town Superintendent in office before the year work is finished, and

Whereas, there seems to be no argument against his holding over to the first of January and taking office with the rest of the town officials, therefore be it

Resolved, that it is the sense of this Board that the Highway Law be so amended that the Town Superintendent of Highways take office the first day of the following January, the same as other town officers, further

ANNUAL REPORT OF COUNTY SUPERINTENDENT OF HIGHWAYS

For the County of Wayne for the Year Ending October 31, 1917

In making my annual report, I am not able to say as I have in the past, that we have done more work, but under the conditions I think it is a very satisfactory report. The Town Superintendents have worked hard and have done their very best, but they have all been troubled in getting help, most of them working short-handed. In Wayne County, the Barge Canal was being pushed to a finish, several pieces of State and County Highway were being constructed which employed the help at higher prices than we felt we could pay and a good many of our young men enlisted in the Army or were drafted, so we were working against obstacles that we could not control.

There is in Wayne county 33.64 miles of State Highway completed and under traffic. There is 5.85 miles under construction; there is 34.83 miles of County Highway under traffic and 14.51 under construction. There was built by the Town Superintendents 18-1/2 miles of town macadam at an average cost of \$2,707.37 per mile, making a total of town macadam in the County of 193-1/2 miles. Resurfaced 3 miles with crushed stone at an average cost of \$319.30. There was 24-5/16 miles of new gravel road built. A large proportion of this mileage was built over a cobblestone base. The average cost per mile was \$1,154.55. There was resurfaced five miles at an average cost of \$406.71 per mile. The total mileage in Wayne County of gravel road is 453-4/18 miles. There was 42 miles turn-piked to standard width, crowned and drained, making a total mileage of earth turnpike of 627-7/8 miles. Heavy cuts and fills have been made in several towns to reduce grades. There was 269 miles regularly honed. There were 64 concrete culverts built at an average cost of \$35.61 each. There were 90 cast iron culverts placed at \$28.76 each. There were 11 concrete bridges built from 5 ft. 11 inches span to 25 foot span, costing on an average of \$599.38 each. They were all well constructed with steel reinforcements. There were several other bridges where concrete abutments were placed under them and retaining walls have been built to protect approaches. There has been placed in the highways of Wayne County this year 43,740 yards of gravel. There has been placed 1,720 feet of tile drain to drain wet and springy places in the highways, making a total of 46,784 feet. There has been built this year 3,610 feet of new guard rail, solid posts with hub and cap rails and painted, making a total of guard rail built since 1909 of 56,310 feet to protect dangerous places and the travelling public. It cost the county to remove the obstructions caused by snow, \$10,536.45.

A number of the towns in Wayne county have adopted the township patrol system and I believe the highways under the patrol system are better taken care of and at a lesser cost than in any other way. Loose stones are kept picked out of the beaten track, approaches to bridges and depressions and bumps over sluices are looked after and taken care of quicker.

Our towns are well supplied with machinery, every town having a steam roller, all but one town a stone crusher. They all have heavy and light graders and road hones, breaking plows, harrows, many of them dump wagons and sprinklers, while quite a number have concrete mixers. Eleven towns own their own storage buildings and the others rent suitable store houses. Machinery is stored when not in use.

The Town Superintendents have kept the stone picked out of the beaten track; noxious weeds, briars and brush fairly well taken care of, although not quite as thoroughly as in previous years on account of shortage of help. The Town Superintendents of Wayne County have an organization. They hold four or five meetings during the winter months at which they discuss all the phases of road building, bridge and sluice construction, the best classes of machinery for different kinds of work, which I believe is a great advantage to any county because the Town Superintendents get the advantage of the different members' experience and there is a more uniform class of work done throughout the county.

All towns in Wayne county are raising enough money in Item One to give them the full amount of State aid and a good many a larger amount.

W. G. SISSON,
County Superintendent of Highways.

The rules and regulations described by the State Highway in the construction of bridges and sluices have been fully complied with. Several of our bridges that were not heavy enough to carry a concrete floor, have been covered with 2 x 4's tarred and set on edge, and spiked together; covered with bituminous matter and covered with either fine crushed lime stone or screened gravel. We have been doing some of this work for the last four or five years and by replacing the gravel and tar coating occasionally they are keeping in excellent repair. It relieves a bridge of a lot of jar and dispenses with the nuisance of the rattling of the plank floors. We have experimented in oiling four pieces of improved highway in different parts of the County, one piece in Palmyra about four miles on the South Creek Road at a cost of \$293.25 which has turned out very satisfactorily. The town of Sodus oiled the Wallington road from the town line of Lyons six miles north, using a blotter at a total cost for oil and blotter of \$117.86 per mile and giving very satisfactory results. The town of Savannah oiled about three miles.

REPORT BY THE DEPARTMENT OF WEIGHTS AND MEASURES

To the Honorable Board of Supervisors of Wayne County.

In the report of the work accomplished by the Department of Weights and Measures during the fiscal year now closing, it is a pleasure to note that the number of false devices for weighing and measuring is gradually decreasing. This first inspection made ten years ago proved that 35 per cent were found to be wrong. In the years following the percentage has been gradually lowering and now has reached for the year of 1917 the low mark of 3½ per cent.

It cannot be hoped that absolute perfection will be reached. Through lack of care it will always be found that a certain number of scales or liquid automatic measures will not deliver the standard quantity. From the fact, however, that in ten years the work of the Department has resulted in the correction from 35 per cent to 3½ per cent, is a gratifying result.

The use of gasoline pumps has been a very serious source of difficulty. The use of these pumps is desirable not only by reason of their convenience, but also on account of their added safety from fire risks. The main trouble has arisen from the fact that although these machines may be mechanically correct, the quality of the gasoline is so uncertain and so variable that they can not be adjusted to one point and left there. The Department, has in accordance with instructions from the State Superintendent, solved the problem insofar as it is capable of solution. The pumps are now inspected to ascertain whether they are mechanically correct, and a notice is then placed upon them directing the owner to procure a proper certified measure and to test the results at least once a day, and upon starting to use every new consignment of liquid. In this way the correctness of the pump is constantly ascertainable and the owner and operator can be held responsible for any failure to deliver the proper amount. To more clearly explain the necessity of this action, our records of the year 1916 show that 29 per cent of these pumps were found incorrect. The results in low percentage of such condemned in the year of 1917 prove that the system adopted has been effective.

The Department has gladly instructed many citizens within its territory in the method of using weighing and measuring devices, and how to purchase such apparatus for their own use. No charges are made for inspection. When these devices are inspected and found correct, a seal is affixed, but this does not mean that these devices are correct for all time; they may be changed either accidentally or on purpose, after the inspection, so that the seal means only that the device was correct when inspected.

Merchants are fast learning that the objects of the Weights and Measures regulation and its results when properly conducted, is the protection of the merchant as well as the purchaser, the manufacturer, the farmer and every person who buys or sells commodities of any sort. The aim of our work is constructive, not destructive.

It is especially a pleasure for the sealer, and a benefit to the merchant,

to consult the former for any aid which the latter may desire. He need not consider that he is asking a favor when he requests aid from the sealer along the lines of his work. Complaints in good faith are always welcomed. A complaint in some particular transaction will often reveal some constructive improvement that can be made, and in many cases investigation has proven an unintentional error and has given the apparent aggressor a chance to set the matter right. This has happened in many instances and always terminated to the satisfaction of the parties interested.

The year's accomplishment of the Department has been the testing of 1,470 scales, of which 103 were found incorrect. The testing of 167 linear measures of which two were found incorrect. The testing of 1,046 dry and liquid measures of which 47 were incorrect. The testing of 189 oil pumps of which 27 were incorrect. The testing of 3,019 weights of which 61 were found incorrect. The total number of tests made were 7,534, of which 313 were found incorrect and condemned, and of this total number 89 were adjusted to correctness.

The number of miles covered by the apparatus to do this work was 8017.
An inventory of the test instruments owned by the County is attached to this report.

Respectfully submitted,

E. F. COWLES,
County Sealer.

REPORT OF BOARD OF CHILD WELFARE

To the Honorable Board of Supervisors of Wayne County, N. Y.

Gentlemen:

The Board of Child Welfare of Wayne County beg to submit the following report for the year ending November 1, 1917:

At the beginning of the year this Board had under supervision 14 families with 39 children whom we were assisting to the average weekly aggregate amount of \$37.50, an annual total rate of \$1,950.00, or an average weekly amount of \$.96 per child.

There were added to our lists during the year 7 families with 18 children, involving an average weekly increase of \$24.50 or an annual increase of \$1,274.00. During the same time aid was discontinued from six families with 19 children, involving an average weekly decrease of \$18.50, or a yearly decrease of \$960.00.

This leaves on November 1, 1917, 15 families under supervision with 36 children, involving a weekly aggregate average expenditure of \$43.50, a total annual rate of \$2,262.00, or a weekly average rate per child of \$1.21.

Of the 15 families now under supervision, three are from Lyons, two from Williamson, two from Arcadia, five from Sodus, two from Wolcott and one from Galen.

Of the six families discharged, three were because of marriage, and three were turned over to the poormasters of the town.

Four applications for aid have been rejected during the year on the ground that they did not meet the requirements of the Child Welfare law.

The balance in the hands of the County Treasurer to the credit of the Child Welfare Board on Nov. 1, 1916 was \$1,958.58
Appropriated by the Board of Supervisors \$2,000.00

Total 3,958.58

Expended by grants to mothers 1,796.50
Expended for incidental expenses 13.28

Total 1,809.78

Leaving a balance on hand Nov. 1, 1917 \$2,148.80

As noted above, the annual rate of expenditure of the Board in grants to mothers at the present time is \$2,262.00, or including incidental expenses, about \$2,300.00.

Owing to the higher cost of living, the demands upon this Board for the ensuing year will doubtless gradually increase. To meet the requirements for the year, we respectfully request your honorable body to appropriate the

sum of \$2,000.00 which with the amount now on hand will make the sum of \$4,148.80 available for the use of the Board of Child Welfare for the present year.

Respectfully submitted,

W. H. KINNEY, Sec'y.

REPORT OF MANAGER F. E. ROGERS

Covering the period from March 1st to December 11th, 1917

Method of Carrying on Work

Before going into detail of the work accomplished, perhaps it would be wise to state, briefly, the plan of the Executive Committee for reaching all communities in the County. After the organization of the Bureau, Local Committees were appointed to represent each community in the County. Each one of these Local Committees met for the purpose of determining just what kind of work was to be done. In this way every section was put on an equal footing. There are about 45 separate communities in the County and the executive committees thought that each locality should at least have an opportunity of securing meetings and demonstrations and other benefits. As a result of these conferences a definite program was drawn up for each local community. This program was put into execution during the season.

Work Accomplished

Perhaps the work during the past season should be divided into two sections, emergency and regular. Under the head of emergency, good emphasis should be laid upon the taking of the Agricultural Census, distribution of seed and aid in securing labor. In connection with the public school system an Agricultural Census was taken last April. The results of this Census were tabulated and printed together with a list of men having seed and live stock for sale. These lists were sent to every farmer in the county. This one thing alone, was a great aid to farmers who desired to buy live stock or seed. In addition three car-loads of seed potatoes were distributed at various points in the county.

The Farm Bureau aided the local dealers in securing a supply of buckwheat seed for those sections where it was not possible to pool the orders and buy direct.

Labor

One hundred and thirty-six men were placed upon farms in the county and 101 boys were secured for work on fruit and muck farms in cooperation with the State Food Supply Commission. One tractor was placed in the town of Lyons. This machine was kept busy throughout the season.

REGULAR WORK

Fruit

Thirteen pruning demonstrations were held last spring with a total attendance of 375. A telegraphic weather forecast was arranged and distributed to the various centers in Wayne County by the telephone company. By this arrangement any farm could call up his central and secure the weather forecast before seven o'clock a. m. This was a great aid to the fruit men as well as other types of farmers in determining the probable weather in the near future. Through an expert located in the county in cooperation with the New York State Food Supply Commission, a spray information service was conducted. Four warnings were sent out by telephone to a total of 165 fruit growers. Four dusting vs. spray tests were conducted with a result that dust and liquid were found to be about equal as fungicides. This year, the total cost of application and of material was also about equal. Six demonstrations of the control of cherry leaf fungus were conducted, five of which proved very satisfactory and instructive.

Eight demonstrations of the control of pear psylla were carried on in the

pear belt, the results being very gratifying. Two demonstrations of the control of pear blight were held with a total attendance of 68 pear growers.

Peaches

This fall the Farm Bureau initiated a campaign for fall spraying to control the leaf curl and sent out 1,000 letters with definite instructions to as many growers.

Poultry

A series of 12 demonstrations on methods of selecting good productive hens was held with a total attendance of 483 poultry growers. As a result of these meetings, 161 poultry men pledged themselves to cull their flocks, aggregating 24,279 hens. Who can measure the value of this campaign alone to the County?

Dairying

Twelve silage variety tests were held in the dairy regions. The results of which have been and will be reported upon in the Farm Bureau News. A Dairymen's Field Day was held in the town of Walworth with an attendance of 250 dairymen.

Muck Crops

Various tests and demonstrations were conducted among the muck growers. These tests covered the matter of seed stocks, disease control and fertilizing needs. As soon as the results of these tests are available, they are given publicity in order that as many as possible of the farmers may be benefited thereby. A successful meeting in cooperation with the State Vegetable Association was held in Williamson during the month of August. Many of the demonstrations were inspected at that time along with the work which the vegetable expert of the local association was carrying on.

Farm Crops

On account of the wet season many demonstrations and tests on ordinary farm crops had to be given up. A very instructive demonstration on the value of selecting seed potatoes, was held in the town of Savannah. The product of one tuber, for instance, weighed 14 pounds, whereas, the product of another planted under the same conditions was only 7.5 pounds, a difference of nearly 100 per cent. It is planned to increase the work along this line another year. The demonstrations of the value of spraying potatoes showed practically no difference in favor of sprayed fields this year in Wayne County. This can be ascribed to non-appearance of blight also to the early frosts which killed the vines before they matured. A successful demonstration of the control of cabbage aphid was held in the vicinity of South Sodus. Inspection of potato fields were carried on in 32 fields. Eight fields passed both inspections. The product of those fields are available for seed purposes.

Beans

Three bean demonstration meetings emphasizing the value of seed selection were held with an attendance of 76. At the time of these meetings, the fertilizer tests on beans were visited. The result of the test on Red Kidney beans in the town of Marion showed that Wayne County seed gave better results than seed from other portions of the state.

Seventy-five tests and demonstrations of various nature were carried on in the county this season.

To aid farmers in determining the value of tractors and to enable them to decide which makes were best adapted to the conditions, a tractor demonstration was held in the town of Lyons with an attendance of 1,000 farmers. In order to give you some idea of the other activities of the Bureau which can not be mentioned in detail, the following figures are submitted to show to some extent how the office and employees of the Bureau have been used by the farmers of Wayne County.

1. Farm visits made, 693.
2. Calls at office, 899.
3. Meetings held or attended, 155.
4. Total attendance at meetings, 9,231.
5. Single letters written, 1,785.
6. Total circulation of all letters, 10,852.
7. Miles traveled by auto, 9,875.

The Wayne County Farm Bureau News has been printed monthly and sent to members. The Bureau has already been asked to secure a power ditcher for work in the county another year. This has practically been promised by the New York State Food Commission. The day after tomorrow, in Clyde, will be held a meeting for the purpose of discussing the feasibility of organizing a County Pea Growers' Association with the idea of ironing out some of the troubles, which stand out between the farmers and canning factories.

The Bureau during the winter plans to hold a meeting of the wool growers with the idea of forming an organization to foster the industry and perhaps provide for the cooperative selling of wool. The live stock breeders are discussing in a similar way the advisability of forming an association to encourage the use of a better class of livestock, thus benefiting the county at large and themselves incidentally.

First of all, our task, as I have seen it, has been to gain the confidence of the farmers and get our organization perfected. A substantial increase in membership justifies a modest claim for a statement that we are gaining the confidence of the farmers. In the second place, our organization while not perfect is such as will allow of better work than we could render last spring. With the confidence of the farmers and a good organization reaching every community of the county, the road is open for some valuable service to the county.

In closing the manager feels that one or two thoughts in the form of recommendations for the future will not be out of place in this report. First of all, every virile farmers' organization should stand by the producers of farm products and aid them to discharge their duty to the nation in this critical hour. This means that the Wayne County Farm Bureau should address itself in the immediate future to such work as doing what it can to secure competent farm labor: making available a sufficient supply of good seeds; aiding the farmers to get labor saving machinery such as power ditchers, tractors, etc., where these machines are practicable.

After this emergency work is performed the Bureau can take up other activities in the way of demonstrating improved methods, controlling pests, organization for marketing and anything else which the officers and members desire to initiate.

F. E. ROGERS,
County Agricultural Agent.
